

AXIS - Products in an Education Environment

AXIS Communications is the largest vendor of network video surveillance cameras in the world. The UK physical security market is currently undergoing a major shift from analogue to IP based video surveillance and AXIS is a major player in driving this shift, offering network video solutions for all markets from small systems to large enterprise installations.

Far too often we hear about educational facilities that have been exposed to vandalism, violence or burglary. As a result, valuable resources are lost to cumbersome repairs and investigations.

A network video solution from AXIS enables you to stay focused on your core business – education. It also gives you a future-proof and cost-efficient tool to:

- + Increase the security for students and staff
- + Prevent violence and theft
- + Minimise the costs for vandalism
- + Investigate incidents and identify suspects

Benefit from the market's broadest range of network cameras, with models suitable for all educational environments. With AXIS, you get a surveillance system that enables remote access to video from any number of branch offices from a single location.

The complete system is easily connected to your existing network infrastructure and computers, thus keeping installation and maintenance costs low.
